## LINK SECURE SECURITY ALARM

The LINK SECURE Security Alarm System is a world-class security alarm solution intended for indoor security alarm requirements.

The product is designed with a special circuitry that gives exceptional levels of protection, reliability and is extremely simple and easy to use.

Security against unexpected motion in critical areas, as well as unexpected door or window openings are tracked using specially designed sensors.

Tracking of tamper attacks like cutting of wires or opening of the system are also monitored and can trigger warning alarms.

Product operation indicates 3 different modes that users can choose from: HOME, OUT and OFF. Pre-programmed user settings are associated with the HOME and OUT modes for extreme user convenience.

Available in 4 and 8 zone systems defined to suit various home, office and building security needs.

- ✓ Easy Installation
- ✓ Simple Operation
- ✓ User Friendly
- ✓ Expandable System

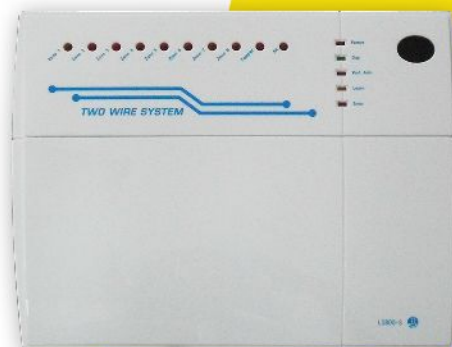

Product Component Matrix per model:

	4-zone	8-zone
Control	1	1
PIR Sensor	2	2
External Siren	1	N/A
Magnetic Contact Sensor	4 pairs	3 pairs
Remote Keys	N/A	2
Adaptor	1	1
Maximum Configuration:		
PIR Sensor	up to 2 per zone	up to 2 per zone
Magnetic Contact	up to 2 per zone	up to 2 per zone
Wireless Remote Keys	N/A	up to 8
Auto-Dialler	1	1
Battery	Use 8 pcs. AA Battery	12 V DC Lead Acid Battery
Voltage Regulator	Optional	Optional

4-zone

8-zone

## LINK SECURE SECURITY ALARM

### Accessories

#### Magnetic Contact Sensor

- Magnetic Switch detects the opening of doors and windows
- Reliable and Versatile
- Quick and easy to install

Type: Magnetically activated switch  
Housing: ABS

#### PIR Sensor

- Sealed Detection Sensor
- Elimination of creep zones
- Hemispherical Lens
- Coverage up to 15m
- Selectable Pulse Count

Type: Dual element with hemispherical lens  
Housing: ABS  
Test LED: Selectable (on/off)  
Mounting Height: 2m  
Detection Range: Up to 15m

#### External Siren

- High output Piezo Sounder
- Use inside and outside
- Quick and Easy to install

Type: Siren  
Housing: ABS  
Siren Output: 110dB at 1m

#### Remote Keys

- Remote Panic Function
- Remote Arm/Disarm Function

Type: Microprocessor Based  
Housing: ABS

*\* Available for 8 zone only*

### Auto Diallers Features

#### Auto Dialler

- The Secure System can call your phone and leave a message
- Microprocessor Based Voice Dialler  
Dial up to 3 numbers
- 20-second single voice message
- Non-Volatile memory

Type: Microprocessor Based  
Housing: ABS

### Home Security & Management System

It senses body heat of moving person; one unit may cover entire room.

It gives audible indication of an alarm condition to warn people who are away from the Control unit. Locate the Siren Box preferably in a prominent position high up on external wall

Designed to detect a door or window opening so it is better mounted onto the frame with a magnet mounted next to it on the door or window

Automatically dial up to 3 pre-programmed phone numbers. Record your own message for notification of alarm event.

The main unit receives signals from detectors that will be transmitted to the user, this will activate warning devices.
